Sundays 0930 145.525MHz

DORKING and DISTRICT RADIO SOCIETY

The society, established in 1947, welcomes those interested in radio communication whether as listeners, radio operators or those simply seeking to keep up to date with the most recent developments.

We meet monthly with invited speakers and opportunity for informal discussion. For the new-comer there are tutorial activities and a course for those interested in obtaining the first level of amateur transmitting licence. We have modern equipment for new members to borrow. Visitors and new members are always welcome.

Our membership covers a wide range of ages. Interests range from international short wave communication, antenna research, very low power transmission, computer digital techniques, vintage wireless restoration and simply using radio as a means of social communication.

DDRS is affiliated to the Radio Society of Great Britain(RSGB).
